#### Genetic testing CMO

You have contributed samples to our research project. We applied a recently developed DNA test that allows the unequivocal diagnosis of the CMO mutation. Further details are given on the information sheet at our web site

[http://www.genetics.unibe.ch/content/service/dog/index\\_eng.html](http://www.genetics.unibe.ch/content/service/dog/index_eng.html)

Lab ID	Dog	Kennel	Breeding ID	Sex	DOB	CMO genotype
WW171	Garçon chic	du Clan des Hamilton	LOF 62949 / 7606	m	02.03.2011	CMO-0

The diagnostic test was carefully conducted using state-of-the-art methodology. Nevertheless, errors cannot be excluded with 100% probability, as there is for example always a very small possibility of novel unknown DNA mutations. We therefore cannot give a warranty on the accuracy of the results. Any liability for subsequent damages in the course of an incorrect test result is excluded.

Kind regards

Prof. Dr. Cord Drögemüller
